

Join a great and growing mission

MentorNet, the world's premiere e-mentoring program, is helping to create a diversified global workforce. We match students at colleges and universities — especially women and underrepresented minorities — to mentors who help them achieve their career goals in engineering and science.

Every year, we help professional societies reinforce member loyalty by matching professional members with student members. Year after year, our mentors and protégés alike tell us how much MentorNet helped them grow and find their place in these professions.

benefits for professional societies

- Provide student members with access to valuable career **advice** and enhance their understanding of the field
- Reinforce member connection and **loyalty** to your professional society
- Increase **conversion** of student membership to professional membership
- Complement and **enhance** any existing mentoring programs
- Increase **diversity** of members
- See live **data** on your participating members and their matches
- Develop ties to our campus partners, including **Stanford, Princeton, Dartmouth, Cornell, U Penn, Ohio State, UT-Austin, Northwestern** and many more. A full list is available at: <http://www.mentornet.net/currentcampuses.aspx>
